

UNDER-RESOURCED LEARNERS WORKSHOP

CUSTOMIZE YOUR WORKSHOP

Benefits:

- ◆ Gives you baseline data by measuring actual classroom behaviors centered on the research-proven concepts in *Under-Resourced Learners*.
- ◆ Identifies areas of strengths and weakness for use in planning future staff development.
- ◆ Provides a progress report showing the true impact on teacher behavior when the inventory is repeated over time.
- ◆ Increases staff awareness and builds ownership in the final plan.
- ◆ Extends the effectiveness of the aha! Process workshop by bringing the concepts to the individual teacher and classroom level.
- ◆ Provides data related to implementation, should you need it for grant purposes.
- ◆ Provides an individual teacher report that can be used in professional growth planning.

Survey Topics:

- ◆ Assess Resources
- ◆ Student Relationships
- ◆ Formal Register and Story Structure
- ◆ Negotiating the Abstract Representational World
- ◆ Appropriate Behaviors
- ◆ Track Student Learning
- ◆ Parent Relationships
- ◆ Community Collaboration

With this workshop, aha! Process offers the added benefit of an online survey that inventories your teachers and staff. The workshop instruction is then data-driven and modified and tailored for your staff to optimize professional development time.

Millions of school-age children are “under-resourced” and at risk of failure in school. This workshop identifies resources all students need and delivers proven, practical strategies for building up these resources and raising expectations for every student in the school. Teachers and administrators will find a gold mine of best practices and interventions to help embed success strategies into their curricula and into the minds and lives of their students. This survey gives you an objective way to monitor progress and measure the degree to which these “gems” are used by your teachers.

This easy to use online survey will inventory each staff member in your district or school as a way to benchmark progress on the journey of implementing Under-Resourced Learners. This survey provides opportunities for both pre- and post-assessment so that understanding and implementation can be tracked over time. Results are individualized for teachers and aggregated for the school leader, which encourages informed planning for future training or areas of focus when implementing the concepts and strategies from Dr. Payne’s work.
